Introduction

CONTINENTAL WICK is the official token of the CONTINENTAL protocol, built on XRPL to provide ultra-fast, low-cost, and privacy-forward transactions.

Designed for real-world execution and digital sovereignty, \$WCK powers the next generation of programmable value exchange and The Utility That Memes.

Protocol Utility

The \$WCK token activates a protocol-grade micro-denomination system built for:

- Smart Contracts
- Streaming Payments
- Atomic Swaps
- OTC Execution
- Real-World Settlement

Technology

Built on the XRP Ledger, \$WCK leverages:

- Speed: Sub-second confirmation times
- Privacy: No exposure of internal state in public mempools
- Efficiency: Fractional fees, no gas auctions
- Interoperability: Built-in DEX, native token support, and sidechain compatibility

Tokenomics — 3x OTC Model

This OTC plan targets a 3x value appreciation by public launch, balancing optics and risk while ensuring sustainable liquidity.

Category Allocation:

- Liquidity / OTC Supply: 10,000,000 \$WCK
- Treasury: 70,000,000 \$WCK
- Reserve (Locked): 20,000,000 \$WCK

Vision

CONTINENTAL WICK isn't just a token — it's infrastructure. A programmable asset for value transfer, identity, ownership, and enforcement in digital economies.

With \$WCK, execution is immediate and precise — whether moving funds, minting NFTs, powering in-game economies, or negotiating peer-to-peer deals.

The Utility That Memes is more than a slogan — it's the integration of culture with function.
